

Monday Favorite Gadget - Anear BBQ Grill Light by Lynn's Recipes

Lynn demonstrates a great grill light that can be used when it is dark outside and you need extra light for grilling. This is an Anear BBQ Grill Light.

This light has 10 ultra bright LED's and attaches to the grill. It has a swivel heat and touch sensor power switch. It is heat and water resistant and made of ABS plastic.

This light requires 3 AA batteries, that are not included, but does include a small screwdriver to remove the battery cover.

Not only can this be used for the grill, but it can be attached to almost anything for use when extra light is required.

This is guaranteed for a lifetime with normal use.

This was sent to me to try and review.
